

The seeds of **progress** are in **Knowledge**

About Galilee International Management Institute (GIMI)

Since its establishment in 1987, Galilee International Management Institute (Israel) has received a global reputation as a leading management institute. Our goal is to provide accessible education, enhance human connections and cooperation, provide knowledge and assist in its implementation.

Our Belief

It is our belief that all countries and people can advance their economies by investing in the human element of education. This is the key to creating sustainable development, social change and a more equal world. We empower people and enable them to bring about positive change in their communities, by encouraging them to think differently, take risks, cooperate, and innovate – we create leaders. To date, more than 25,000 senior managers, administrators and planners, from over 170 countries, have graduated from our Programmes.

Why Us

Our Programmes create an in-depth learning experience, combined with a commitment to professionalism, a personal touch and present the Israeli success story. A country renowned for pioneering cutting-edge technology, and rapid economic and infrastructural development, despite a lack of natural resources and regional strategic challenges.

Knowledge Centres

We offer adaptable training programmes designed to support the achievement of strategic and development goals of public and private sector organisations. This is achieved by providing a holistic training solution.

The Centre for Capacity Building's activities are dedicated to addressing cross-cutting issues crucial for achieving capacity development resulting in resilient societies, and sustainable development.

Our study platform options include LIVE online sessions, local Programmes, and onsite in Israel.

Our topic-specific knowledge centres specialise in providing access to Israel's advanced know-how.

Word from the Chairman of the Board

At the heart of economic development lies the transformative power of education. The State of Israel, despite its small size and security challenges, has succeeded in building a robust and dynamic economy. This success can be attributed to Israel's recognition of the transformative power of knowledge acquisition and skill development.

Galilee International Management Institute stands as a testament to this belief. We are dedicated to educating senior officials and professionals from all over the world and shaping the future of management education. Our institute serves as a beacon of knowledge and collaboration, bridging gaps between nations and empowering individuals to become catalysts of change within their communities.

The institute's comprehensive curriculum focuses on subjects where Israel possesses a relative advantage, including agriculture, environment, and water management, health management, higher education and crisis and emergency management.

Furthermore, Galilee Institute's Centre for Strategic Studies plays a pivotal role in shaping geopolitical landscapes by providing a comprehensive understanding of strategic thinking, security analysis, and conflict resolution. Graduates armed with this knowledge contribute to building resilient and peaceful societies, promoting dialogue, and fostering cooperation between nations.

With an unwavering commitment to excellence, innovation, and global cooperation, Galilee Institute empowers individuals to make a difference in their communities and shape a brighter future for all.

By acknowledging the transformative power of education, Galilee Institute nurtures leaders who contribute to sustainable economic development and make a lasting impact on the world stage.

Dr. Amram Aharoni

Chairman, Board of Trustees,
Galilee International Management Institute

Word from the President

Our aim is to share the Israeli experience of social and economic development with leaders all around the world. From 1987 until today, thousands of leaders have participated in short and long training programmes, which focus on education and capacity building as a major vehicles for development. All studies indicate that the societies and countries that base their strategies on research and capacity building show rapid and balanced growth.

Israel achieved independence in 1948. By the end of the century, it became a global high-tech hub, thanks to investment in education and capacity building. Israeli agriculture is high-tech driven, enabling our farmers to compete successfully in the world market. Our programmes aim to share the knowledge we have acquired with those responsible for furthering the development of their countries.

We continue to work with our Alumni when returning to their countries, to ensure the successful implementation of Israeli methods and techniques adapted to local resources and needs.

Dr. Joseph Shevel

President,
Galilee International Management Institute
